

Frankenstein; or, The Modern Prometheus

By Mary Wollstonecraft Shelley

Project Gutenberg Edition — NLP Assignment

Chapter 1

It was the best of times it was the worst of times it was the age of wisdom it was the age of foolishness it was the epoch of belief it was the epoch of incredulity it was the season of Light it was the season of Darkness it was the spring of hope it was the winter of despair we had everything before us we had nothing before us we were all going direct to Heaven we were all going direct the other way.

You will rejoice to hear that no disaster has accompanied the commencement of an enterprise which you have regarded with such evil forebodings. I arrived here yesterday, and my first task is to assure my dear sister of my welfare and increasing confidence in the success of my undertaking. I am already far north of London, and as I walk in the streets of Petersburg, I feel a cold northern breeze play upon my cheeks, which braces my nerves and fills me with delight.

The monster was hideous and wretchedly poor yet not weak in spirit for he had learned to speak and observe the world around him with great intelligence and curiosity. He wandered through the forests and mountains seeking understanding of human nature observing the cottagers and learning their language their customs and their social bonds.

In a hole in the ground there lived a hobbit. Not a nasty dirty wet hole filled with the ends of worms and an oozy smell nor yet a dry bare sandy hole with nothing in it to sit down on or to eat it was a hobbit hole and that means comfort. The hobbit was a very well to do hobbit and his name was Bilbo Baggins.

Call me Ishmael. Some years ago never mind how long precisely having little or no money in my purse and nothing particular to interest me on shore I thought I would sail about a little and see the watery part of the world. It is a way I have of driving off the spleen and regulating the circulation. Whenever I find myself growing grim about the mouth whenever it is a damp drizzly November in my soul whenever I find myself involuntarily pausing before coffin warehouses and bringing up the rear of every funeral I meet.

It is a truth universally acknowledged that a single man in possession of a good fortune must be in want of a wife. However little known the feelings or views of such a man may be on his first entering a neighbourhood this truth is so well fixed in the minds of the surrounding families that he is considered as the rightful property of some one or other of their daughters.

Chapter 2

Happy families are all alike every unhappy family is unhappy in its own way. Everything was in confusion in the Oblonsky household. The wife had discovered that the husband was carrying on an intrigue with a French girl who had been a governess in their family and she had announced to her husband that she could not go on living in the same house with him.

Many years later as he faced the firing squad Colonel Aureliano Buendia was to remember that distant afternoon when his father took him to discover ice. At that time Macondo was a village of twenty adobe houses built on the bank of a river of clear water that ran along a bed of polished stones which were white and enormous like prehistoric eggs.

The sky above the port was the color of television tuned to a dead channel. All the neon and the com hash of the Sprawl were behind them now. He had operated on an almost permanent adrenaline high a byproduct of youth and proficiency which now tasted of ashes and failure.

It was a bright cold day in April and the clocks were striking thirteen. Winston Smith his chin nuzzled into his breast in an effort to escape the vile wind slipped quickly through the glass doors of Victory Mansions though not quickly enough to prevent a swirl of gritty dust from entering along with him.

Last night I dreamt I went to Manderley again. It seemed to me I stood by the iron gate leading to the drive and for a while I could not enter for the way was barred to me. There was a padlock and a chain upon the gate. I called in my dream to the lodge keeper and had no answer and peering closer through the rusted spokes of the gate I saw that the lodge was uninhabited.

The man in black fled across the desert and the gunslinger followed. The desert was the apotheosis of all deserts huge standing to the sky for what looked like eternity in all directions. It was white blinding and waterless and without feature save for the faint track the man in black had left.

Chapter 3

Mother died today. Or maybe yesterday I cannot be sure. The telegram from the Home says Your mother passed away. Funeral tomorrow. Deep sympathy. Which leaves the matter doubtful it could have been yesterday.

Where were you when I laid the foundations of the earth? Tell me if you have understanding. Who determined its measurements? Surely you know! Or who stretched the line upon it? To what were its foundations fastened? Or who laid its cornerstone when the morning stars sang together and all the sons of God shouted for joy?

Natural language processing is a subfield of linguistics computer science and artificial intelligence concerned with the interactions between computers and human language in particular how to program computers to process and analyze large amounts of natural language data. The goal is a computer capable of understanding the contents of documents including the contextual nuances of the language within them.

Machine learning is a method of data analysis that automates analytical model building. It is based on the idea that systems can learn from data identify patterns and make decisions with minimal human intervention. As a branch of artificial intelligence it encompasses a variety of techniques including supervised learning unsupervised learning and reinforcement learning.

Text preprocessing is an essential step in natural language processing tasks. It involves transforming raw text into a clean format that can be understood by machine learning algorithms. Common preprocessing steps include tokenization stop word removal stemming lemmatization and feature extraction through methods like bag of words or term frequency inverse document frequency.

The TF-IDF score stands for term frequency inverse document frequency and it is a numerical statistic that reflects how important a word is to a document in a collection or corpus. It is often used as a weighting factor in searches of information retrieval text mining and user modeling. The TF-IDF value increases proportionally to the number of times a word appears in the document.

Chapter 4

Stemming is the process of reducing a word to its word stem that affixes to suffixes and prefixes or to the roots of words known as a lemma. Stemming is important in natural language understanding and natural language processing where the purpose of stemming is to reduce derivational or inflectional forms of a word to a common base form.

Lemmatization is the process of grouping together the inflected forms of a word so they can be analysed as a single item identified by the word lemma or dictionary form. For example the word better has good as its lemma. This link is missed by stemming as stemming only looks at the form of the word and not at its meaning.

It was the best of times it was the worst of times it was the age of wisdom it was the age of foolishness it was the epoch of belief it was the epoch of incredulity it was the season of Light it was the season of Darkness it was the spring of hope it was the winter of despair we had everything before us we had nothing before us we were all going direct to Heaven we were all going direct the other way.

The sky above the port was the color of television tuned to a dead channel. All the neon and the com hash of the Sprawl were behind them now. He had operated on an almost permanent adrenaline high a byproduct of youth and proficiency which now tasted of ashes and failure.

It was a bright cold day in April and the clocks were striking thirteen. Winston Smith his chin nuzzled into his breast in an effort to escape the vile wind slipped quickly through the glass doors of Victory Mansions though not quickly enough to prevent a swirl of gritty dust from entering along with him.

Last night I dreamt I went to Manderley again. It seemed to me I stood by the iron gate leading to the drive and for a while I could not enter for the way was barred to me. There was a padlock and a chain upon the gate. I called in my dream to the lodge keeper and had no answer and peering closer through the rusted spokes of the gate I saw that the lodge was uninhabited.

The man in black fled across the desert and the gunslinger followed. The desert was the apotheosis of all deserts huge standing to the sky for what looked like eternity in all directions. It was white blinding and waterless and without feature save for the faint track the man in black had left.

Mother died today. Or maybe yesterday I cannot be sure. The telegram from the Home says Your mother passed away. Funeral tomorrow. Deep sympathy. Which leaves the matter doubtful it could have been yesterday.

Where were you when I laid the foundations of the earth? Tell me if you have understanding. Who determined its measurements? Surely you know! Or who stretched the line upon it? To what were its foundations fastened? Or who laid its cornerstone when the morning stars sang together and all the sons of God shouted for joy?

Chapter 20

Natural language processing is a subfield of linguistics computer science and artificial intelligence concerned with the interactions between computers and human language in particular how to program computers to process and analyze large amounts of natural language data. The goal is a computer capable of understanding the contents of documents including the contextual nuances of the language within them.

Machine learning is a method of data analysis that automates analytical model building. It is based on the idea that systems can learn from data identify patterns and make decisions with minimal human intervention. As a branch of artificial intelligence it encompasses a variety of techniques including supervised learning unsupervised learning and reinforcement learning.

Text preprocessing is an essential step in natural language processing tasks. It involves transforming raw text into a clean format that can be understood by machine learning algorithms. Common preprocessing steps include tokenization stop word removal stemming lemmatization and feature extraction through methods like bag of words or term frequency inverse document frequency.

The TF-IDF score stands for term frequency inverse document frequency and it is a numerical statistic that reflects how important a word is to a document in a collection or corpus. It is often used as a weighting factor in searches of information retrieval text mining and user modeling. The TF-IDF value increases proportionally to the number of times a word appears in the document.

Stemming is the process of reducing a word to its word stem that affixes to suffixes and prefixes or to the roots of words known as a lemma. Stemming is important in natural language understanding and natural language processing where the purpose of stemming is to reduce derivational or inflectional forms of a word to a common base form.

Lemmatization is the process of grouping together the inflected forms of a word so they can be analysed as a single item identified by the word lemma or dictionary form. For example the word better has good as its lemma. This link is missed by stemming as stemming only looks at the form of the word and not at its meaning.

Chapter 21

It was the best of times it was the worst of times it was the age of wisdom it was the age of foolishness it was the epoch of belief it was the epoch of incredulity it was the season of Light it was the season of Darkness it was the spring of hope it was the winter of despair we had everything before us we had nothing before us we were all going direct to Heaven we were all going direct the other way.

You will rejoice to hear that no disaster has accompanied the commencement of an enterprise which you have regarded with such evil forebodings. I arrived here yesterday, and my first task is to assure my dear sister of my welfare and increasing confidence in the success of my undertaking. I am already far north of London, and as I walk in the streets of Petersburg, I feel a cold northern breeze play upon my cheeks, which braces my nerves and fills me with delight.

The monster was hideous and wretchedly poor yet not weak in spirit for he had learned to speak and observe the world around him with great intelligence and curiosity. He wandered through the forests and mountains seeking understanding of human nature observing the cottagers and learning their language their customs and their social bonds.

In a hole in the ground there lived a hobbit. Not a nasty dirty wet hole filled with the ends of worms and an oozy smell nor yet a dry bare sandy hole with nothing in it to sit down on or to eat it was a hobbit hole and that means comfort. The hobbit was a very well to do hobbit and his name was Bilbo Baggins.

Call me Ishmael. Some years ago never mind how long precisely having little or no money in my purse and nothing particular to interest me on shore I thought I would sail about a little and see the watery part of the world. It is a way I have of driving off the spleen and regulating the circulation. Whenever I find myself growing grim about the mouth whenever it is a damp drizzly November in my soul whenever I find myself involuntarily pausing before coffin warehouses and bringing up the rear of every funeral I meet.

It is a truth universally acknowledged that a single man in possession of a good fortune must be in want of a wife. However little known the feelings or views of such a man may be on his first entering a neighbourhood this truth is so well fixed in the minds of the surrounding families that he is considered as the rightful property of some one or other of their daughters.

Chapter 22

Happy families are all alike every unhappy family is unhappy in its own way. Everything was in confusion in the Oblonsky household. The wife had discovered that the husband was carrying on an intrigue with a French girl who had been a governess in their family and she had announced to her husband that she could not go on living in the same house with him.

Many years later as he faced the firing squad Colonel Aureliano Buendia was to remember that distant afternoon when his father took him to discover ice. At that time Macondo was a village of twenty adobe houses built on the bank of a river of clear water that ran along a bed of polished stones which were white and enormous like prehistoric eggs.

The sky above the port was the color of television tuned to a dead channel. All the neon and the com hash of the Sprawl were behind them now. He had operated on an almost permanent adrenaline high a byproduct of youth and proficiency which now tasted of ashes and failure.

It was a bright cold day in April and the clocks were striking thirteen. Stemming is important in natural language understanding and natural language processing where the purpose of stemming is to reduce derivational or inflectional forms of a word to a common base form.

Lemmatization is the process of grouping together the inflected forms of a word so they can be analysed as a single item identified by the word lemma or dictionary form. For example the word better has good as its lemma. This link is missed by stemming as stemming only looks at the form of the word and not at its meaning.

It was the best of times it was the worst of times it was the age of wisdom it was the age of foolishness it was the epoch of belief it was the epoch of incredulity it was the season of Light it was the season of Darkness it was the spring of hope it was the winter of despair we had everything before us we had nothing before us we were all going direct to Heaven we were all going direct the other way.

You will rejoice to hear that no disaster has accompanied the commencement of an enterprise which you have regarded with such evil forebodings. I arrived here yesterday, and my first task is to assure my dear sister of my welfare and increasing confidence in the success of my undertaking. I am already far north of London, and as I walk in the streets of Petersburg, I feel a cold northern breeze play upon my cheeks, which braces my nerves and fills me with delight.

Chapter 38

The monster was hideous and wretchedly poor yet not weak in spirit for he had learned to speak and observe the world around him with great intelligence and curiosity. He wandered through the forests and mountains seeking understanding of human nature observing the cottagers and learning their language their customs and their social bonds.

In a hole in the ground there lived a hobbit. Not a nasty dirty wet hole filled with the ends of worms and an oozy smell nor yet a dry bare sandy hole with nothing in it to sit down on or to eat it was a hobbit hole and that means comfort. The hobbit was a very well to do hobbit and his name was Bilbo Baggins.

Call me Ishmael. Some years ago never mind how long precisely having little or no money in my purse and nothing particular to interest me on shore I thought I would sail about a little and see the watery part of the world. It is a way I have of driving off the spleen and regulating the circulation. Whenever I find myself growing grim about the mouth whenever it is a damp drizzly November in my soul whenever I find myself involuntarily pausing before coffin warehouses and bringing up the rear of every funeral I meet.

It is a truth universally acknowledged that a single man in possession of a good fortune must be in want of a wife. However little known the feelings or views of such a man may be on his first entering a neighbourhood this truth is so well fixed in the minds of the surrounding families that he is considered as the rightful property of some one or other of their daughters.

Happy families are all alike every unhappy family is unhappy in its own way. Everything was in confusion in the Oblonsky household. The wife had discovered that the husband was carrying on an intrigue with a French girl who had been a governess in their family and she had announced to her husband that she could not go on living in the same house with him.

Many years later as he faced the firing squad Colonel Aureliano Buendia was to remember that distant afternoon when his father took him to discover ice. At that time Macondo was a village of twenty adobe houses built on the bank of a river of clear water that ran along a bed of polished stones which were white and enormous like prehistoric eggs.

Chapter 39

The sky above the port was the color of television tuned to a dead channel. All the neon and the com hash of the Sprawl were behind them now. He had operated on an almost permanent adrenaline high a byproduct of youth and proficiency which now tasted of ashes and failure.

It was a bright cold day in April and the clocks were striking thirteen. Winston Smith his chin nuzzled into his breast in an effort to escape the vile wind slipped quickly through the glass doors of Victory Mansions though not quickly enough to prevent a swirl of gritty dust from entering along with him.

Last night I dreamt I went to Manderley again. It seemed to me I stood by the iron gate leading to the drive and for a while I could not enter for the way was barred to me. There was a padlock and a chain upon the gate. I called in my dream to the lodge keeper and had no answer and peering closer through the rusted spokes of the gate I saw that the lodge was uninhabited.

The man in black fled across the desert and the gunslinger followed. The desert was the apotheosis of all deserts huge standing to the sky for what looked like eternity in all directions. It was white blinding and waterless and without feature save for the faint track the man in black had left.

Mother died today. Or maybe yesterday I cannot be sure. The telegram from the Home says Your mother passed away. Funeral tomorrow. Deep sympathy. Which leaves the matter doubtful it could have been yesterday.

Where were you when I laid the foundations of the earth? Tell me if you have understanding. Who determined its measurements? Surely you know! Or who stretched the line upon it? To what were its foundations fastened? Or who laid its cornerstone when the morning stars sang together and all the sons of God shouted for joy?

Chapter 40

Natural language processing is a subfield of linguistics computer science and artificial intelligence concerned with the interactions between computers and human language in particular how to program computers to process and analyze large amounts of natural language data. The goal is a computer capable of understanding the contents of documents including the contextual nuances of the language within them.

Machine learning is a method of data analysis that automates analytical model building. It is based on the idea that systems can learn from data identify patterns and make decisions with minimal human intervention. As a branch of artificial intelligence it encompasses a variety of techniques including supervised learning unsupervised learning and reinforcement learning.

Text preprocessing is an essential step in natural language processing tasks. It involves transforming raw text into a clean format that can be understood by machine learning algorithms. Common preprocessing steps include tokenization stop word removal stemming lemmatization and feature extraction through methods like bag of words or term frequency inverse document frequency.

The TF-IDF score stands for term frequency inverse document frequency and it is a numerical statistic that reflects how important a word is to a document in a collection or corpus. It is often used as a weighting factor in searches of information retrieval text mining and user modeling. The TF-IDF value increases proportionally to the number of times a word appears in the document.

Stemming is the process of reducing a word to its word stem that affixes to suffixes and prefixes or to the roots of words known as a lemma. Stemming is important in natural language understanding and natural language processing where the purpose of stemming is to reduce derivational or inflectional forms of a word to a common base form.

Lemmatization is the process of grouping together the inflected forms of a word so they can be analysed as a single item identified by the word lemma or dictionary form. For example the word better has good as its lemma. This link is missed by stemming as stemming only looks at the form of the word and not at its meaning.

Chapter 41

Many years later as he faced the firing squad Colonel Aureliano Buendia was to remember that distant afternoon when his father took him to discover ice. At that time Macondo was a village of twenty adobe houses built on the bank of a river of clear water that ran along a bed of polished stones which were white and enormous like prehistoric eggs.

The sky above the port was the color of television tuned to a dead channel. All the neon and the com hash of the Sprawl were behind them now. He had operated on an almost permanent adrenaline high a byproduct of youth and proficiency which now tasted of ashes and failure.

It was a bright cold day in April and the clocks were striking thirteen. Winston Smith his chin nuzzled into his breast in an effort to escape the vile wind slipped quickly through the glass doors of Victory Mansions though not quickly enough to prevent a swirl of gritty dust from entering along with him.

Chapter 56

Last night I dreamt I went to Manderley again. It seemed to me I stood by the iron gate leading to the drive and for a while I could not enter for the way was barred to me. There was a padlock and a chain upon the gate. I called in my dream to the lodge keeper and had no answer and peering closer through the rusted spokes of the gate I saw that the lodge was uninhabited.

The man in black fled across the desert and the gunslinger followed. The desert was the apotheosis of all deserts huge standing to the sky for what looked like eternity in all directions. It was white blinding and waterless and without feature save for the faint track the man in black had left.

Mother died today. Or maybe yesterday I cannot be sure. The telegram from the Home says Your mother passed away. Funeral tomorrow. Deep sympathy. Which leaves the matter doubtful it could have been yesterday.

Where were you when I laid the foundations of the earth? Tell me if you have understanding. Who determined its measurements? Surely you know! Or who stretched the line upon it? To what were its foundations fastened? Or who laid its cornerstone when the morning stars sang together and all the sons of God shouted for joy?

Natural language processing is a subfield of linguistics computer science and artificial intelligence concerned with the interactions between computers and human language in particular how to program computers to process and analyze large amounts of natural language data. The goal is a computer capable of understanding the contents of documents including the contextual nuances of the language within them.

Machine learning is a method of data analysis that automates analytical model building. It is based on the idea that systems can learn from data identify patterns and make decisions with minimal human intervention. As a branch of artificial intelligence it encompasses a variety of techniques including supervised learning unsupervised learning and reinforcement learning.

Chapter 57

Text preprocessing is an essential step in natural language processing tasks. It involves transforming raw text into a clean format that can be understood by machine learning algorithms. Common preprocessing steps include tokenization stop word removal stemming lemmatization and feature extraction through methods like bag of words or term frequency inverse document frequency.

The TF-IDF score stands for term frequency inverse document frequency and it is a numerical statistic that reflects how important a word is to a document in a collection or corpus. It is often used as a weighting factor in searches of information retrieval text mining and user modeling. The TF-IDF value increases proportionally to the number of times a word appears in the document.

Stemming is the process of reducing a word to its word stem that affixes to suffixes and prefixes or to the roots of words known as a lemma. Stemming is important in natural language understanding and natural language processing where the purpose of stemming is to reduce derivational or inflectional forms of a word to a common base form.

Lemmatization is the process of grouping together the inflected forms of a word so they can be analysed as a single item identified by the word lemma or dictionary form. For example the word better has good as its lemma. This link is missed by stemming as stemming only looks at the form of the word and not at its meaning.

It was the best of times it was the worst of times it was the age of wisdom it was the age of foolishness it was the epoch of belief it was the epoch of incredulity it was the season of Light it was the season of Darkness it was the spring of hope it was the winter of despair we had everything before us we had nothing before us we were all going direct to Heaven we were all going direct the other way.

You will rejoice to hear that no disaster has accompanied the commencement of an enterprise which you have regarded with such evil forebodings. I arrived here yesterday, and my first task is to assure my dear sister of my welfare and increasing confidence in the success of my undertaking. I am already far north of London, and as I walk in the streets of Petersburg, I feel a cold northern breeze play upon my cheeks, which braces my nerves and fills me with delight.

Chapter 58

The monster was hideous and wretchedly poor yet not weak in spirit for he had learned to speak and observe the world around him with great intelligence and curiosity. He wandered through the forests and mountains seeking understanding of human nature observing the cottagers and learning their language their customs and their social bonds.

In a hole in the ground there lived a hobbit. Not a nasty dirty wet hole filled with the ends of worms and an oozy smell nor yet a dry bare sandy hole with nothing in it to sit down on or to eat it was a hobbit hole and that means comfort. The hobbit was a very well to do hobbit and his name was Bilbo Baggins.

Call me Ishmael. Some years ago never mind how long precisely having little or no money in my purse and nothing particular to interest me on shore I thought I would sail about a little and see the watery part of the world. It is a way I have of driving off the spleen and regulating the circulation. Whenever I find myself growing grim about the mouth whenever it is a damp drizzly November in my soul whenever I find myself involuntarily pausing before coffin warehouses and bringing up the rear of every funeral I meet.

It is a truth universally acknowledged that a single man in possession of a good fortune must be in want of a wife. However little known the feelings or views of such a man may be on his first entering a neighbourhood this truth is so well fixed in the minds of the surrounding families that he is considered as the rightful property of some one or other of their daughters.

Happy families are all alike every unhappy family is unhappy in its own way. Everything was in confusion in the Oblonsky household. The wife had discovered that the husband was carrying on an intrigue with a French girl who had been a governess in their family and she had announced to her husband that she could not go on living in the same house with him.

Many years later as he faced the firing squad Colonel Aureliano Buendia was to remember that distant afternoon when his father took him to discover ice. At that time Macondo was a village of twenty adobe houses built on the bank of a river of clear water that ran along a bed of polished stones which were white and enormous like prehistoric eggs.

Chapter 74

Stemming is the process of reducing a word to its word stem that affixes to suffixes and prefixes or to the roots of words known as a lemma. Stemming is important in natural language understanding and natural language processing where the purpose of stemming is to reduce derivational or inflectional forms of a word to a common base form.

Lemmatization is the process of grouping together the inflected forms of a word so they can be analysed as a single item identified by the word lemma or dictionary form. For example the word better has good as its lemma. This link is missed by stemming as stemming only looks at the form of the word and not at its meaning.

It was the best of times it was the worst of times it was the age of wisdom it was the age of foolishness it was the epoch of belief it was the epoch of incredulity it was the season of Light it was the season of Darkness it was the spring of hope it was the winter of despair we had everything before us we had nothing before us we were all going direct to Heaven we were all going direct the other way.

You will rejoice to hear that no disaster has accompanied the commencement of an enterprise which you have regarded with such evil forebodings. I arrived here yesterday, and my first task is to assure my dear sister of my welfare and increasing confidence in the success of my undertaking. I am already far north of London, and as I walk in the streets of Petersburg, I feel a cold northern breeze play upon my cheeks, which braces my nerves and fills me with delight.

The monster was hideous and wretchedly poor yet not weak in spirit for he had learned to speak and observe the world around him with great intelligence and curiosity. He wandered through the forests and mountains seeking understanding of human nature observing the cottagers and learning their language their customs and their social bonds.

In a hole in the ground there lived a hobbit. Not a nasty dirty wet hole filled with the ends of worms and an oozy smell nor yet a dry bare sandy hole with nothing in it to sit down on or to eat it was a hobbit hole and that means comfort. The hobbit was a very well to do hobbit and his name was Bilbo Baggins.

Chapter 75

Call me Ishmael. Some years ago never mind how long precisely having little or no money in my purse and nothing particular to interest me on shore I thought I would sail about a little and see the watery part of the world. It is a way I have of driving off the spleen and regulating the circulation. Whenever I find myself growing grim about the mouth whenever it is a damp drizzly November in my soul whenever I find myself involuntarily pausing before coffin warehouses and bringing up the rear of every funeral I meet.

It is a truth universally acknowledged that a single man in possession of a good fortune must be in want of a wife. However little known the feelings or views of such a man may be on his first entering a neighbourhood this truth is so well fixed in the minds of the surrounding families that he is considered as the rightful property of some one or other of their daughters.

Happy families are all alike every unhappy family is unhappy in its own way. Everything was in confusion in the Oblonsky household. The wife had discovered that the husband was carrying on an intrigue with a French girl who had been a governess in their family and she had announced to her husband that she could not go on living in the same house with him.

Many years later as he faced the firing squad Colonel Aureliano Buendia was to remember that distant afternoon when his father took him to discover ice. At that time Macondo was a village of twenty adobe houses built on the bank of a river of clear water that ran along a bed of polished stones which were white and enormous like prehistoric eggs.

The sky above the port was the color of television tuned to a dead channel. All the neon and the com hash of the Sprawl were behind them now. He had operated on an almost permanent adrenaline high a byproduct of youth and proficiency which now tasted of ashes and failure.

It was a bright cold day in April and the clocks were striking thirteen. Winston Smith his chin nuzzled into his breast in an effort to escape the vile wind slipped quickly through the glass doors of Victory Mansions though not quickly enough to prevent a swirl of gritty dust from entering along with him.

Chapter 76

Last night I dreamt I went to Manderley again. It seemed to me I stood by the iron gate leading to the drive and for a while I could not enter for the way was barred to me. There was a padlock and a chain upon the gate. I called in my dream to the lodge keeper and had no answer and peering closer through the rusted spokes of the gate I saw that the lodge was uninhabited.

The man in black fled across the desert and the gunslinger followed. The desert was the apotheosis of all deserts huge standing to the sky for what looked like eternity in all directions. It was white blinding and waterless and without feature save for the faint track the man in black had left.

Mother died today. Or maybe yesterday I cannot be sure. The telegram from the Home says Your mother passed away. Funeral tomorrow. Deep sympathy. Which leaves the matter doubtful it could have been yesterday.

Where were you when I laid the foundations of the earth? Tell me if you have understanding. Who determined its measurements? Surely you know! Or who stretched the line upon it? To what were its foundations fastened? Or who laid its cornerstone when the morning stars sang together and all the sons of God shouted for joy?

Natural language processing is a subfield of linguistics computer science and artificial intelligence concerned with the interactions between computers and human language in particular how to program computers to process and analyze large amounts of natural language data. The goal is a computer capable of understanding the contents of documents including the contextual nuances of the language within them.

Machine learning is a method of data analysis that automates analytical model building. It is based on the idea that systems can learn from data identify patterns and make decisions with minimal human intervention. As a branch of artificial intelligence it encompasses a variety of techniques including supervised learning unsupervised learning and reinforcement learning.

Chapter 77

Text preprocessing is an essential step in natural language processing tasks. It involves transforming raw text into a clean format that can be understood by machine learning algorithms. Common preprocessing steps include tokenization stop word removal stemming lemmatization and feature extraction through methods like bag of words or term frequency inverse document frequency.

The TF-IDF score stands for term frequency inverse document frequency and it is a numerical statistic that reflects how important a word is to a document in a collection or corpus. It is often used as a weighting factor in searches of information retrieval text mining and user modeling. The TF-IDF value increases proportionally to the number of times a word appears in the document.

Stemming is the process of reducing a word to its word stem that affixes to suffixes and prefixes or to the roots of words known as a lemma. Stemming is important in natural language understanding and natural language processing where the purpose of stemming is to reduce derivational or inflectional forms of a word to a common base form.

Chapter 92

Happy families are all alike every unhappy family is unhappy in its own way. Everything was in confusion in the Oblonsky household. The wife had discovered that the husband was carrying on an intrigue with a French girl who had been a governess in their family and she had announced to her husband that she could not go on living in the same house with him.

Many years later as he faced the firing squad Colonel Aureliano Buendia was to remember that distant afternoon when his father took him to discover ice. At that time Macondo was a village of twenty adobe houses built on the bank of a river of clear water that ran along a bed of polished stones which were white and enormous like prehistoric eggs.

The sky above the port was the color of television tuned to a dead channel. All the neon and the com hash of the Sprawl were behind them now. He had operated on an almost permanent adrenaline high a byproduct of youth and proficiency which now tasted of ashes and failure.

It was a bright cold day in April and the clocks were striking thirteen. Winston Smith his chin nuzzled into his breast in an effort to escape the vile wind slipped quickly through the glass doors of Victory Mansions though not quickly enough to prevent a swirl of gritty dust from entering along with him.

Last night I dreamt I went to Manderley again. It seemed to me I stood by the iron gate leading to the drive and for a while I could not enter for the way was barred to me. There was a padlock and a chain upon the gate. I called in my dream to the lodge keeper and had no answer and peering closer through the rusted spokes of the gate I saw that the lodge was uninhabited.

The man in black fled across the desert and the gunslinger followed. The desert was the apotheosis of all deserts huge standing to the sky for what looked like eternity in all directions. It was white blinding and waterless and without feature save for the faint track the man in black had left.

Chapter 93

Mother died today. Or maybe yesterday I cannot be sure. The telegram from the Home says Your mother passed away. Funeral tomorrow. Deep sympathy. Which leaves the matter doubtful it could have been yesterday.

Where were you when I laid the foundations of the earth? Tell me if you have understanding. Who determined its measurements? Surely you know! Or who stretched the line upon it? To what were its foundations fastened? Or who laid its cornerstone when the morning stars sang together and all the sons of God shouted for joy?

Natural language processing is a subfield of linguistics computer science and artificial intelligence concerned with the interactions between computers and human language in particular how to program computers to process and analyze large amounts of natural language data. The goal is a computer capable of understanding the contents of documents including the contextual nuances of the language within them.

Machine learning is a method of data analysis that automates analytical model building. It is based on the idea that systems can learn from data identify patterns and make decisions with minimal human intervention. As a branch of artificial intelligence it encompasses a variety of techniques including supervised learning unsupervised learning and reinforcement learning.

Text preprocessing is an essential step in natural language processing tasks. It involves transforming raw text into a clean format that can be understood by machine learning algorithms. Common preprocessing steps include tokenization stop word removal stemming lemmatization and feature extraction through methods like bag of words or term frequency inverse document frequency.

The TF-IDF score stands for term frequency inverse document frequency and it is a numerical statistic that reflects how important a word is to a document in a collection or corpus. It is often used as a weighting factor in searches of information retrieval text mining and user modeling. The TF-IDF value increases proportionally to the number of times a word appears in the document.

Chapter 94

Stemming is the process of reducing a word to its word stem that affixes to suffixes and prefixes or to the roots of words known as a lemma. Stemming is important in natural language understanding and natural language processing where the purpose of stemming is to reduce derivational or inflectional forms of a word to a common base form.

Lemmatization is the process of grouping together the inflected forms of a word so they can be analysed as a single item identified by the word lemma or dictionary form. For example the word better has good as its lemma. This link is missed by stemming as stemming only looks at the form of the word and not at its meaning.

It was the best of times it was the worst of times it was the age of wisdom it was the age of foolishness it was the epoch of belief it was the epoch of incredulity it was the season of Light it was the season of Darkness it was the spring of hope it was the winter of despair we had everything before us we had nothing before us we were all going direct to Heaven we were all going direct the other way.

You will rejoice to hear that no disaster has accompanied the commencement of an enterprise which you have regarded with such evil forebodings. I arrived here yesterday, and my first task is to assure my dear sister of my welfare and increasing confidence in the success of my undertaking. I am already far north of London, and as I walk in the streets of Petersburg, I feel a cold northern breeze play upon my cheeks, which braces my nerves and fills me with delight.

The monster was hideous and wretchedly poor yet not weak in spirit for he had learned to speak and observe the world around him with great intelligence and curiosity. He wandered through the forests and mountains seeking understanding of human nature observing the cottagers and learning their language their customs and their social bonds.

In a hole in the ground there lived a hobbit. Not a nasty dirty wet hole filled with the ends of worms and an oozy smell nor yet a dry bare sandy hole with nothing in it to sit down on or to eat it was a hobbit hole and that means comfort. The hobbit was a very well to do hobbit and his name was Bilbo Baggins.

Chapter 95

Call me Ishmael. Some years ago never mind how long precisely having little or no money in my purse and nothing particular to interest me on shore I thought I would sail about a little and see the watery part of the world. It is a way I have of driving off the spleen and regulating the circulation. Whenever I find myself growing grim about the mouth whenever it is a damp drizzly November in my soul whenever I find myself involuntarily pausing before coffin warehouses and bringing up the rear of every funeral I meet.

It is a truth universally acknowledged that a single man in possession of a good fortune must be in want of a wife. However little known the feelings or views of such a man may be on his first entering a neighbourhood this truth is so well fixed in the minds of the surrounding families that he is considered as the rightful property of some one or other of their daughters.

Happy families are all alike every unhappy family is unhappy in its own way. Everything was in confusion in the Oblonsky household. The wife had discovered that the husband was carrying on an intrigue with a French girl who had been a governess in their family and she had announced to her husband that she could not go on living in the same house with him.

Many years later as he faced the firing squad Colonel Aureliano Buendia was to remember that distant afternoon when his father took him to discover ice.
